Dear Jane Hennessy, 100 AUG 16 P2:25

I see that you are a "M.S." I hope that you further investigate the use of antibiotics used in cows, chicken, beef - all animals that are used as food to our U. S. citizens & or anyone else in the world.

I am concerned for my children, grand children & all citizens. The antibiotics in milk, meat, fruits & ~~vegetables~~ Vegetables are accumulating in our bodies & making us resistant to antibiotics.

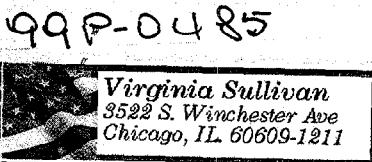

It seems our wonderful government wants to kill us all off, I noted the only thing that counts are the big pay off by the large companies, therefore, one thing & everything goes, we the little people do not count.

I am 71 years old. I have 6 children - 11 grandchildren.

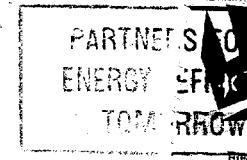

I also, am worried about the little ones drinking the milk from the cows that are full of antibiotics.

Sincerely,
Virginia Sullivan
